

## **Geography: Year 11 Mock 1 2021**

### **Being Organised**

Every pupil has a blue textbook and corresponding revision guide published by Oxford. They cover all exam topics. **THIS IS THE BEST PLACE TO START REVISION.**

There are further model answers and mark schemes published by the Geography Department of St Leonard's, for each topic and they have been provided within lessons. Pupils have been given a folder and when possible, started a new exercise book for each section which is clearly labelled which exam paper it is for.

At present pupils should keep their folder and revision guide at home, pupils only need to bring in their current UK Landscapes exercise book and the textbook.

### **Independent Revision**

Alongside the revision materials provided by the department, model answers and exam questions, students could independently access the online materials as listed below. Students could regularly read over the lists of key terms for each unit of work and test themselves on spellings and definitions so that Geographical vocabulary can be used effectively in written answers.

### **Exam Board Guidance**

Exam Board [Specification](#). The parts relevant to our course at the moment are:

Living with the Physical Environment Sections A and C

Challenges in the Human Environment Section B
